March 6, 2003

Dear Participant,

Evinco International has developed a delicious Equilib Powder, Orange Drink Mix that will be available for purchase beginning March 10, 2003. The price per container, for a one month introductory period, is \$29.95 per canister; there are 25 servings in one container of 425 grams. After the introductory period the price will be \$44.95 per canister. TO ORDER, OR FOR MORE INFORMATION CALL TOLL FREE 1-866-438-7093.

Product Development

This latest product offering is a powdered drink developed in conjunction with Dr Nayan Shah who received his Ph.D. in Food Science from Rutgers University. He has 27 years of food and supplement industry experience in product development, nutrition, regulatory, and quality assurance. The Equilib Orange Drink Mix uses the same high quality ingredients as the Equilib capsules and, using Dr Shah's extensive experience with flavor profiles, we have developed a powdered drink that tastes good and is a convenient enjoyable way to provide nutritional support for the Central Nervous System.

Suggested Use

The Equilib Powder, Orange Drink Mix is designed for use by individual's who are under 12 years of age, are capsule intolerant, or prefer variety in their daily regimen. The cost efficiency of the powder is best achieved if used in combination with capsules. We suggest that the powder be used in the mornings or evenings and capsules during mid-morning or afternoon. For additional dose instructions contact your Evinco Representative.

Research

Like the Equilib capsules, this product is intended for use with the Equilib open label study. Research suggests that individuals in the early phases of mental/emotional distress require significant support and symptom monitoring to ensure the right intervention is provided to help them maintain their mental health. The Equilib open label study has been designed to provide qualified assistance to participants and their healthcare provider. Each participant is assigned a research assistant who helps the healthcare provider by gathering information and maintains reports in the S.A.F.E. Cell (Symptom And Feedback Evaluation) database. The medical professional is updated regularly and is able to see the progress of participants and make changes in their programs with a high degree of confidence. If you would like to know more about the Equilib open label study contact Evinco International by calling toll free, 1-866-438-4623, or visit our web site www.equilib.us.

We hope you enjoy this new product.

Sincerely,

E Wesley Huff

C.O.O., Evinco International
